## CONTAINERIZING THE APPLICATION:

The screenshot shows the Docker Desktop application window. The title bar includes 'Docker Desktop', an 'Update to latest' button, and a user profile 'madhavesusheel'. The left sidebar contains navigation options: 'Containers' (selected), 'Images', 'Volumes', 'Dev Environments' (with a 'BETA' badge), 'Extensions' (with a 'BETA' badge), and 'Add Extensions'. The main area is titled 'Containers' and includes a 'Give feedback' link. Below the title is a description of containers and a 'Learn more' link. A toggle switch 'Only show running containers' is present, along with a search bar. A table lists the containers:

		NAME	IMAGE	STATUS	PORT(S)	STARTED	ACTIONS
<input type="checkbox"/>		kind_saha 90dd6397eafd	<a href="#">app:latest</a>	Running	<a href="#">5000:5000</a>	7 seconds ago	

At the bottom right of the main area, it says 'Showing 1 items'. The bottom status bar shows system metrics: 'RAM 3.38GB', 'CPU 4.07%', and 'Connected to Hub', along with the version 'v4.13.0' and a help icon.
